4. Issues

Issue	Status	Notes
Tasks stalling	Green	Team members were working on some tasks individually with little success. Moving forward the team has decided to change who works on what to stop this issue
Task still left to complete	Green	Not everything was completed. To reduce stalling on work items, different team members will be assigned the task next iteration.

5. Assessment

Assessment target	Complete all Objectives by the end of iteration.
Assessment date	12/08
Participants	All
Project status	Yellow

- **Assessment against objectives**

UAT initial tests/Exploration - Pass
UI/UX polish and refinement - Failed
Bug fixing - Failed
Unit and Integration testing - Failed
UAT confirmation tests - Failed

- **Work Items: Planned compared to actually completed**

Most objectives are in progress of being complete. Most functional issues are fixed, what is left are UX bugs.

The work completed in the template editor helps move along the inspection portion as well, as the same activities are used.

- **Assessment against Evaluation Criteria Test results**

UAT initial tests/Exploration - Pass
UI/UX polish and refinement - In progress, teamwork required to complete these, also need more research on material design
Bug fixing - In progress, most major bugs have been addressed
Unit and Integration testing - Not started
UAT confirmation tests - Started, scripts created and completed first pass

- **Other concerns and deviations**

Team members to assist others to avoid work items being stalled
Progress made, but still a lot of work to go
